Class MSc IT Sem. 4th (LE) Subject RESEARCH METHODOLOGY(223)

SESSION	TOPICS
Week 1	Objectives and types of research: Definition and types of research (Descriptive and analytical research, applied and fundamental research, qualitative and quantitative research, conceptual and empirical research).
Week 2	Research problem formulation: Defining and formulating research problem and its necessity, selecting the problem, literature review and its importance; Primary and secondary data sources-library (books, journals, periodicals
Week 3	reference sources, abstracting and indexing sources, reviews, monographs), patents, web (search engines, online libraries, online journals, e-books, e-encyclopedia, institutional websites), Journals and books-standards of research journals (impact factor, ISSN, ISBN, online and print journals, indexed journals, peer reviewed journals), citation index, H-index; Identifying gaps areas from literature review.
Week 4	Research design and methods: Developing the research hypothesis; Research design – basic principles and need,
Week 5	Reporting and thesis writing: Structure and components of research report, types of report-monographs, review articles, research papers, thesis, books, technical reports and their significance;
Week 6	Important concepts; Observations and facts, laws and theories, prediction and explanation, induction, deduction; Development of models, developing a research plan, exploration, description, diagnosis, experimentation
Week 7	Data collection: Execution of research, observation and collection of data, methods of data collection, primary data, secondary data.
Week 8	Mid semester Test
Week 9	Mid semester Test
Week 10	Presentation of research papers: Poster presentations-layout and format; Oral presentation-planning, preparation, use of visual art, importance of effective communication.
Week 11	Different steps in preparation of a written scientific document- layout, structure and language of reports, illustrations and tables, bibliography, references, footnotes
Week 12	Application of intellectual property rights: Commercialization, copyright, royalty, intellectual property rights and patent law
Week 13	Plagiarism-concept and authentication of originality of research; Citation and acknowledgement; Reproducibility and accountability

Week 14	Cost analysis of project: Cost incurred on raw materials, different testing procedures, cost of instrumentation, downstream processing cost (wherever required); Cost of clinical trials
Week 15	Research grants: National/International funding agencies; Government and private bodies.
Week 16	Documentation: Techniques and importance of documentation; Role of internet, information technology and computers in research and documentation
